

EARTH DAY RECYCLING TIPS

Recycling diverts waste from landfills, reduces greenhouse gas emissions and minimizes water usage, making it key to addressing climate change. **But currently, the U.S. recycles less than half its bottles and cans.**

SIMPLE ACTS. BIG IMPACT.

This Earth Day, follow these **simple tips** to remember (through rhyming!) how and what to recycle, so we can all live in a world where plastic never becomes waste.

Did you know that recycling one plastic bottle saves enough energy to charge your smartphone for 39 hours?

1 CAP IT TO SCRAP IT!

Remember to put the cap back on your beverages — they're recyclable too!

2 ALUMINUM AND STEEL WILL SEAL THE DEAL! METAL, GLASS AND PLASTIC ARE ALSO FANTASTIC.

Aluminum and steel cans are almost always recyclable, as are metal, glass and plastic containers.

3 KEEP YOUR RECYCLING STREAM CLEAN.

Empty and rinse containers, and avoid tossing items that can't be recycled — they can ruin a whole load.

Disclaimer: Recycling varies by community. Check with your local municipality to learn what items can be recycled where you live.

ONE BOTTLE. ONE PERSON. ONE ACTION.

Bigger change starts with one bottle, with one person, with one action. Our simple acts combined can lead to a big impact this **Earth Day.**
